Roadmap 2.0 Expansion
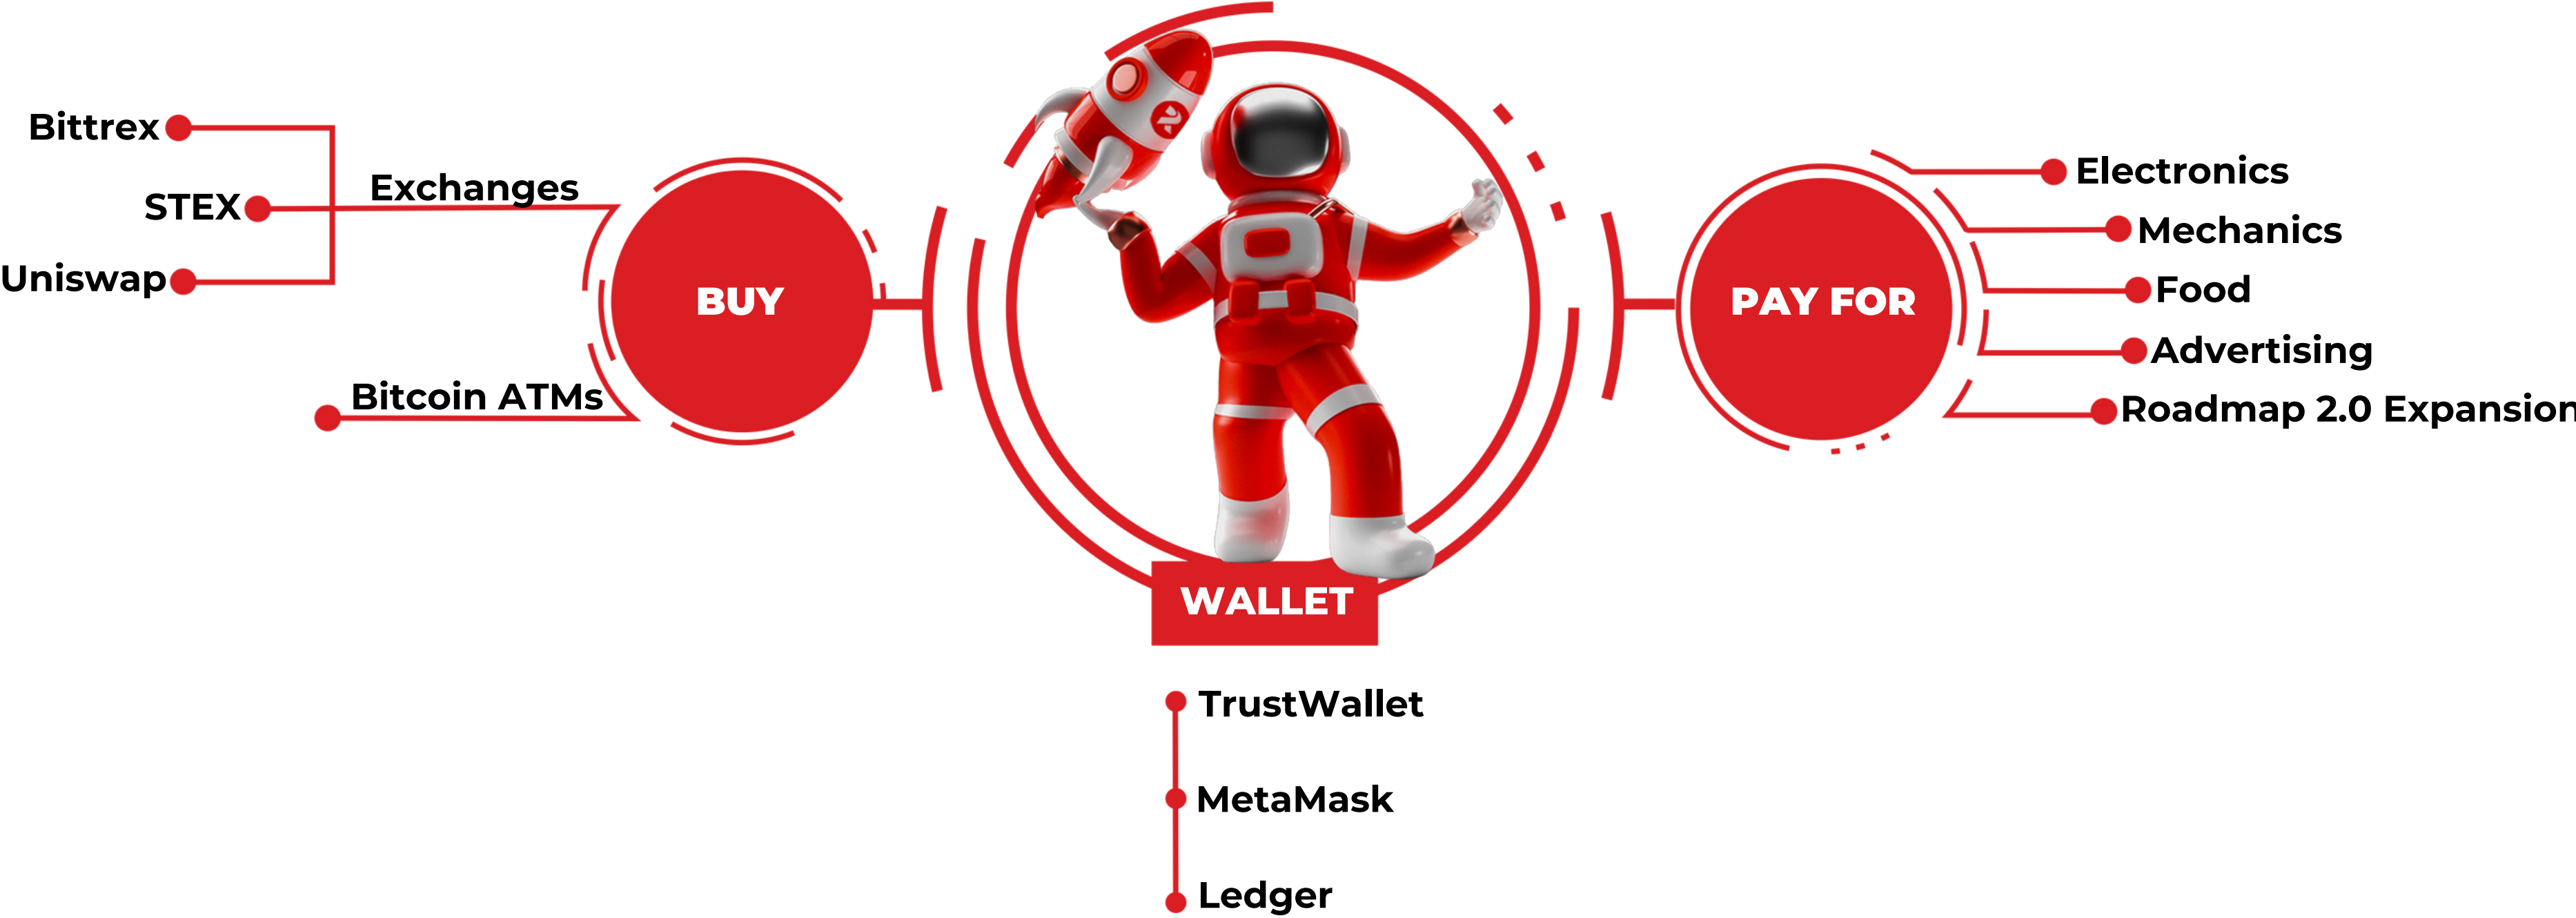

# MAIN USAGE FOR INDIVIDUALS

Cryptocurrency with ever-expanding usability.
Since 2017 our team has been successfully working on
increasing the usability of Rotharium. Being the first Austrian
B2C cryptocurrency that can be used as a payment voucher:
Rotharium is here to stay.

Benefits for Individuals:

Rotharium is a currency easily attainable from Bittrex, Stex, Uniswap, and Bitcoin ATMs. The developer team
behind it has been working on expanding the infrastructure of partnering companies since 2017. The
ongoing expansion of partnerships ensures the continuous increase of usability of Rotharium.
Currently: Rotharium can be used for trading and purchasing goods and services in various branches.

# MAIN USAGE FOR BUSINESSES
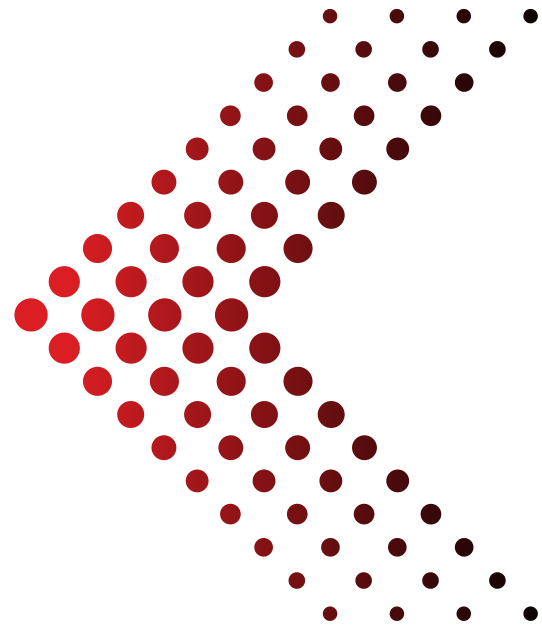

Blockchain has impressive usability for businesses. Rotharium team envisioned this as early as 2017. Ever since, we have been working on adapting businesses to blockchain technology, working not only on integration solutions but also on expanding the network of partners, continuously expanding the usability of Rotharium.
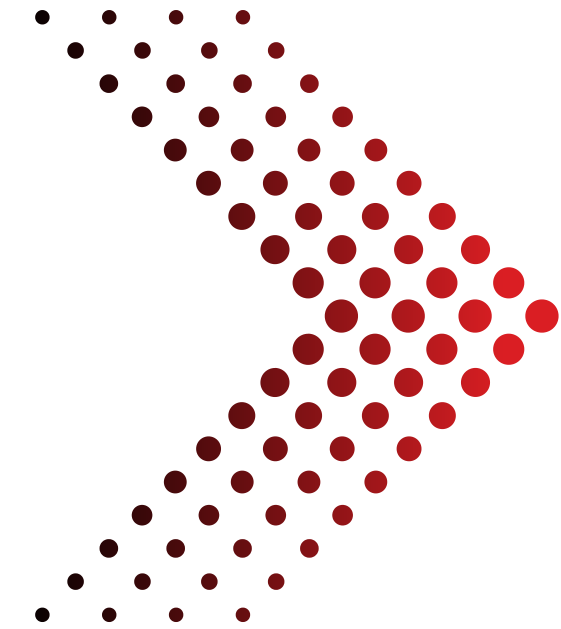

**Benefits for businesses:**

Keeping in tune with innovations is vital for businesses, yet it is much easier said than done. Rotharium team offers integration of business infrastructure to blockchain and crypto payment systems. Depending on the needs of the business, the team develops and maintains this infrastructure. Thanks to our experience, we can offer a smooth transition and an integration that is simple to use for businesses.
